CRUZE

roller blind system

Where engineering meets *design*

Underpinning the Cruze brand is the desire to fuse engineering and design, in order to create a high-performance system that provides fluid operation and enhanced user experience. System aesthetics merge with precision engineering, resulting in the coveted Cruze Roller Blind System.

Technical Specification

Merging functionality & style

The Cruze Roller Blind System presents innovative concepts and performance-enhancing components, culminating in an advanced roller blind system with functionality and style at the core.

Created for both domestic and commercial environments, the system has been designed to house 32mm & 40mm roller clutches, resulting in a roller blind system suitable for the majority of window sizes.

Define your Style

Boasting a wide array of system features and a selection of refined profile colours, Cruze offers a distinctive range of fascia, back bar, end cap, and bottom bar options. Enabling you to complement your own interior style.

Colour Options:

White

Anthracite

Black

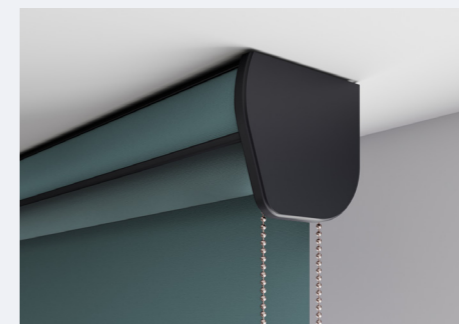

70mm Fascia Profile

Cruze Fascias

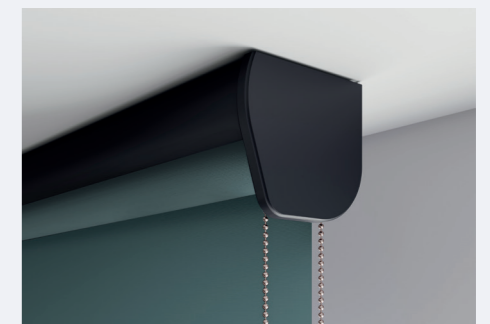

By enhancing the visual appeal of interior spaces with a sleek and elegant touch, the Cruze fascia adds a refined finish to your roller blinds whilst seamlessly blending style with practicality. Styling your window covering with a Cruze fascia is a statement of sophistication, offering a visually appealing design that also enhances the functionality of your blinds.

- Available in white, anthracite & black.
- Available in half fascia (40mm) and full fascia (70mm) sizes. Each size has the option to insert a matching strip of fabric.
- Designed to house 32mm & 40mm roller clutches.
- Concealing the fabric roll & brackets with a fascia creates a sleek, modern and discreet addition to the roller blind.
- Engineered with high performing & long-lasting aluminium.
- Fascias enhance light control by blocking light entering the interior from above the roller tube.
- Incorporates a channel for duo roller blinds.

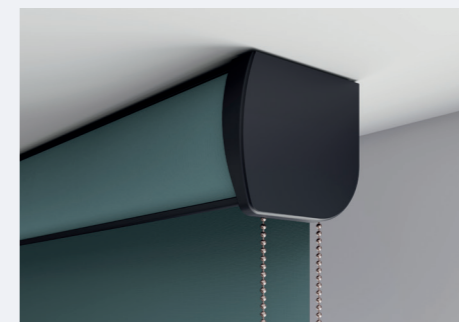

Cruze fascias are the perfect combination of modern style and maximum performance, elevating ambiance while ensuring lasting quality.

A New Level of Detail

Cruze prides itself on meticulous attention to detail, ensuring that even the smallest aspects are thoughtfully considered.

Offering something for all tastes and styles, Cruze presents two unique fascia offerings that enable ultimate choice for styling your blind.

Fascia Profile:

- For a minimal aesthetic opt for a unique fascia profile, specifically designed without any insert tracks, providing a stripped back design and enhancing the versatility of the Cruze Roller Blind System.

Fabric Insert Fascia Profile:

- Add further depth, warmth and character to your space with a cut of fabric matching the roller blind inserted along the front face of the fascia.

Duo Roller

Cap it Off

End caps are the finishing touch for a complete fascia. The Cruze Roller Blind System pushes the boundaries with two unique end cap offerings, designed to complement the fascia and provide a modern, clean and superior finish to the blind.

- Linear Profile: For a uniform and sophisticated finish.
- Curved Profile: An alternative end cap for a distinct finish.

Roller Clutches

Cruze roller clutches utilise technology, insight and expertise. Resulting in a range of highly efficient, reliable and long lasting clutches.

- Available in 32mm & 40mm.
- Engineered with high-grade acetal plastic.
- Coated internally with a tailored solution for enhanced performance.

Back Bar

Cruze offers a versatile back bar option, compatible with both 32mm & 40mm systems.

- Meticulously designed to ensure easy installation.
- Back bars help to prevent warping or bending, ensuring long lasting performance on larger blinds.

Double Roller Bracket

Cruze double roller blinds are an excellent choice for those searching for both versatility and style. Cruze double roller brackets are not available with a fascia.

- Compatible with both 32mm & 40mm clutch systems.
- Two roller blinds operate independently within one bracket.
- Combine a sheer fabric for privacy during the day, with a blackout blind for light control at night.
- Double roller blinds help to create energy efficient homes with an extra layer of insulation.

*All Cruze Roller Blind System components are available in white, anthracite & black.

Motorisation made *simple*

CRUZE

Stelor

Smart *living*

Cruze roller blinds can be motorised using a suite of motor options, offering both battery and mains powered solutions. Motorised Cruze roller blinds create safe, comfortable and energy efficient homes.

CRUZE

Created with precision engineering to offer a battery powered solution, Cruze Motors are available for standard 32mm or 40mm roller tubes, removing the need for mains wiring.

CRUZE x **Stelor**

Stelor motorised blinds provide smart solutions for improved home safety and comfort. With rechargeable motors for 32mm and 40mm roller tubes, they offer a sleek, wire-free design that integrates seamlessly into your blinds.

CRUZE x **somfy**.

Somfy motors provide battery powered motorised blind solutions for a wide range of window sizes. With the Somfy Connectivity kit, you can control your blinds via smart home devices and mobile apps, integrating the Hub and App for seamless smart home interaction.

ALL THE TIME. TOTAL CONTROL

Smart home *voice control*

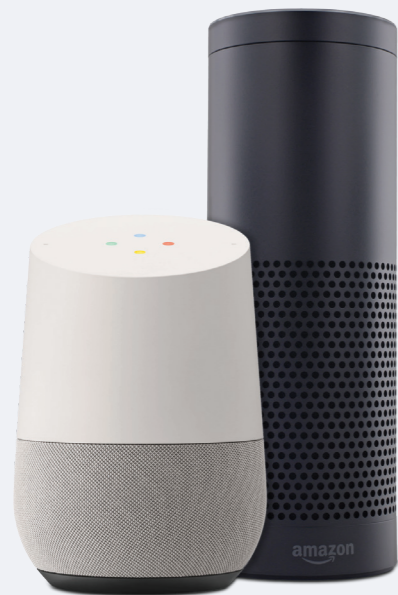

By integrating the Somfy Connectivity Kit and App with your other smart home devices, you can take your home automation to the next level and experience a truly connected lifestyle.

With this integration, your blinds become an integral part of your smart home, enabling you to control them with ease and convenience using a variety of methods.

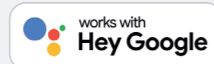

You can simply use your voice to issue commands to your smart home device, allowing you to effortlessly raise or lower your blinds and adjust the lighting and privacy of your home.

You can also set up timers and schedules through selected smart home devices, ensuring that your blinds are always in sync with your daily routine and preferences.

somfy.

*“Alexa, open
the blinds”*

CRUZE

Energy Saving

Maximise your home's energy efficiency by making your Cruze roller blinds smart. Smart home integration is made simple with the Somfy Connectivity Kit, allowing you to maximise heat retention whether you're at home or not. When connected with smart home devices, set timers to close your blinds to retain as

much heat as possible, wherever you are. Allowing you to return to a warmer, more comfortable home while helping to reduce energy bills. During the colder months you may want to set your motorised blinds to remain open while the sun is shining, and time them to shut when the sun sets.

Cruze Double Roller Blind: Glimpse Noir with Halo Pure

CRUZE

Safety

When motorised, Cruze roller blinds offer enhanced child-safety, due to the elimination of low hanging cords.

Motorised blinds help to increase the privacy and security of your home. Easily set timers when you are not at home to give the impression that someone is there, allowing you to keep your blinds opened during the day, and closed in the evening, whether you are home or not.
